DETAILED ACTION

In the response filed 12/28/07, the Applicant has elected Claims 1-26, 31-56, and 61-73 for further prosecution and canceled claims 27-30 and 57-60.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-26, 31-56, and 61-73 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 recites the steps for initializing user interface software for controlling an audio conference device. The claim further recites that the steps occurs "in no particular order". This renders the claim vague and indefinite since the scope of the claim is not defined. Apparently, the change in the order of the steps will change the scope of the claim and cause a serious lack of antecedent basis problem.

For example, if "using the set up program to electronically map the inputs and outputs to input and output ports on the audio conference device" occurs before "selecting at least one audio input from the set up program" and "selecting at least one audio output from the set up program", the limitation "the inputs and outputs" will be lack of antecedent basis. In addition, this order will render the claim indefinite since without user's selection of input and output, it is undefined

Art Unit: 2173

which input and output the set up program will map to the ports. Even assuming arguendo that the set up program knows which input and output to map to the ports, then the purposes of steps "selecting at least one audio input from the set up program" and "selecting at least one audio output from the set up program" are uncertain since if the set up program automatically knows which input and output to map, input or output selections will be useless.

In conclusion, while particular order of the steps is essential to define the scope of the claim, the cited "no particular order" renders the claim vague and indefinite.

In order for the Examiner to be able to reasonably appraise the scope of the claim to conduct the search and apply art rejection, the steps in the claim have to be in a defined particular order.

Claims 2-13 depend on claim 1 and are rejected for similar rationale.

Claims 14-26, 31-56, and 61-73 are rejected for similar rationale applied to claims 1-13.
